Art Unit: 3662

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Kent et al (6,014,372) or Wu et al (Pat. No. 6,504,502).

Kent et al teach a method for correcting spacecraft thermal distortion antenna pointing errors including measuring (fig. 1) spacecraft thermal distortion parameter values, calculating (840; col 9, lines 20+) estimated antenna thermal distortion pointing errors, and adjusting (col 11, lines 4+; abstract) the antenna pointing.

Wu et al teach a method for correcting spacecraft thermal distortion antenna pointing errors including measuring (230A, 230B; col 1, lines 45-48) spacecraft thermal distortion parameter values, calculating 702 estimated antenna thermal distortion pointing errors, and adjusting 704 the antenna pointing.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 3662

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reckdahl et al (Pat. No. 6,720,918) in view of Chu et al (Pat. No. 5,587,714).

Reckdahl et al teach a method for correcting spacecraft thermal distortion antenna pointing errors including measuring (16, 20; abstract) spacecraft thermal distortion parameter values, calculating (15; abstract) estimated antenna thermal distortion pointing errors. Reckdahl et al do not teach the step of adjusting the antenna pointing. However, Chu et al teach the step of adjusting the antenna pointing 28. It would have been obvious to employ the step of adjusting the antenna pointing as taught by Chu et al into Reckdahl et al to correct the pointing error.

5. Claims 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 10-26 are allowed.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dao L. Phan whose telephone number is (571)272-6976. The examiner can normally be reached on M-F 9:00-5:30.
